STAGE CRAFTS
Chris Hoggett
Stage Crafts is a comprehensive reference guide that will be tremendously useful for all types of production, from school plays to professional theatre.
Hardback

THE STAGE LIGHTING HANDBOOK
Francis Reid
Widely regarded as the standard work on the subject, this popular book embraces the latest technology, but also continues to discuss the basic principles.
Paperback

STAGE LIGHTING
Graham Walters
Create professional lighting effects for all types of theatre productions. Information includes everything from basic electrical theory and rigging lights to producing special effects on a budget.
Paperback

Promoscan

Order Ref: **PMS**

Ultimately flexible and versatile in use, Promoscan is quite unique in the number of facilities it offers as a stand alone package.

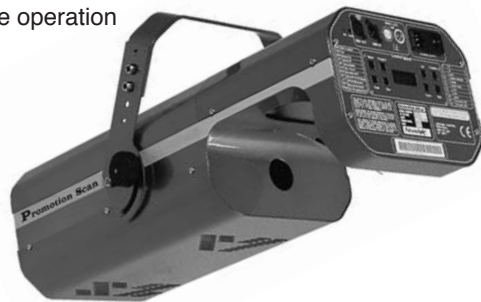

Promoscan is an intelligent scanner unit with all the control electronics built in, making a unit that can be used in thousands of promotional applications. Product launches, conferences, exhibitions, in-store promotion, concerts, sporting events. Promoscan with its myriad accurate moving images will always attract attention for you and your products.

Here are some of the features:

- Takes up to 5 static corporate logos or messages (gobos)
- Takes up to 4 standard 35mm colour transparencies of product shots - applications, etc
- Zoom facility to make images larger or smaller
- Infinitely variable focus for sharp results at every step
- On board storage for 10 programmes of up to 99 steps with 11 adjustable functions per step
- Programmes can be sequenced in any order
- Built in colour changer with 10 colours plus rainbow scrolling at variable speed. Also split colours possible
- Logos can be superimposed over product shots
- Variable speed strobing possible for maximum impact
- Mechanical dimmer for gradual fading
- Long lamp life 2000 hours
- Built in lamp life indicator (resettable)
- Total elapsed time indicator
- 7 day clock for automatic switch on/off to suit your opening hours
- Battery back up stores programmes for 2 years
- Optional infra red remote control for re-programming in-situ
- Variable speed rotation of colour slides possible both directions
- On board microphone for sound animation
- Pre-View of programmes possible
- Editing of programmes possible
- Several units can be linked together and controlled by standard DMX 512 protocol
- Last but by no means least. Top quality components for long trouble free operation

Technical Specification
